Work Experience

Programming Teacher

CodeWizardsHQ, September 2023 - June 2024

- Responsible for instructing kids K-12 in a variety of programming topics from python to HTML within a dedicated classroom format.

Junior Web Developer

Oklahoma Lottery Commission, July 2021 - July 2022

- Implemented a front end redesign of agency website (lottery.ok.gov) under senior supervision, requiring a custom webpack/vue architecture to intermesh with a legacy .Net MVC 5 codebase.
- Designed and implemented an agency content delivery network on Microsoft Azure as well as a custom content management system via Vue/TinyMCE for departmental automations.
- Tasked with maintenance of the legacy website and internal agency applications throughout the above two points.

Software Development Intern

Deep Fork Technology, Sep 2020 - Feb 2021

- Worked with Deepfork's first dedicated in-house development team on local per-client projects. Covering a variety of roles from system design and requirements gathering to web-development and DBA.

Education

Computer Science

University of Oklahoma, May 2018 - May 2021

Engineering Mathematics

Oklahoma City Community College, June 2013 - August 2016
